

# OVERSEEDING PROGRAM

Overseeding by no means is an inexpensive project. Poor germination and slow start up can lead to wasted dollars and more work. The most important goals are fast germination, fast rooting and quicker establishment of turf on tees, greens and fairways, or lawns and stadiums. Fine tuning your program will assure that costly bentgrass or perennial rye, poa trivialis (rough blue grass) get established quickly for play. In the north for re-seeding follow the “rule of thumb” for Sept 15 as your to-do date for re-seeding your cool season grasses. In the south get prepared before the cool months hit as warm season grasses go into dormancy. Your goal is to get fairways looking a brilliant green just in time for the snow birds’s heavy traffic. Each selected product in our Overseeding program serves an important purpose for quick, healthy establishment of turf for overseeding and re-seeding.

PRODUCTS	RATE PER ACRE	INTERVAL	COMMENTS
Recover Rx 3-18-18 with Salicylic Acid	1 - 3 gal	Repeat at 14 days	<ul style="list-style-type: none"> <li>• Root Stimulation</li> <li>• Strong Stand</li> <li>• Stimulates plant’s resistance to stress &amp; disease</li> <li>• While in transition apply after first cut (8 -10 days) so not to stimulate bermuda grass.</li> </ul>
<b>OR</b>			
Starter Starter Plus (8-32-5)	½ - 1.6 gal	Repeat at 14 days	<ul style="list-style-type: none"> <li>• While in transition apply after first cut (8 -10 days) so not to stimulate bermuda grass.</li> <li>• Tank mix compatible</li> </ul>
<b>WITH</b>			
Re-Store Plus (3-0-2)	½ - 1 gal	Repeat at 14 - 21 days	<ul style="list-style-type: none"> <li>• Root and strength of the seeding turgidity</li> <li>• Reduce pressure of mowing</li> </ul>
<b>OR</b>			
Essential® Plus 1-0-1 100% Natural Organic Biostimulant & Soil Amendment	½ -1 gal	Repeat at 14 - 21 days	<ul style="list-style-type: none"> <li>• Increase &amp; quicken seed germination</li> <li>• Reduce Stress from thatching</li> <li>• Cell division</li> <li>• Root stimulation</li> <li>• Contains a natural wetting agent</li> </ul>
<b>WITH</b>			
Companion® Biological Fungicide	1 1/3 gal	7 - 14 days	<ul style="list-style-type: none"> <li>• Prevention of disease - Pythium attack of new seedlings.</li> </ul>
